Guidelines for Contents of First Aid Boxes

All places of employment must have workers trained in first aid and first aid boxes with the equipment they need to offer first aid service quickly and safely.

Sections 8, 9, 10, 11 and 16 of Regulation 1101 list the items that must be included in the first aid boxes in workplaces of different types and sizes. The quantities of any item specified may be increased to suit the needs of a particular workplace. Personal protective equipment (for example, CPR mask and non-latex gloves) as prescribed by the first aid training should also be included in the first aid box. In a location where a physician or registered nurse is available, the employer may authorize them to expand the contents of the first aid boxes.

Equipment outside of the scope of first aiders, equipment that may deteriorate or that is potentially dangerous (for example, medication and ointments) should not be included in a first aid box.

Section 6 of the Regulation requires that the boxes and their contents be checked regularly, minimum four times a year, to ensure that everything is in good order.
